

The Hard-Workers

How might cultural aspects make it harder for people to adjust to a new life?

How can technology be used as a tool to help with this adjustment, rather than something to harm or hurt?

What social norms or traditions would need to be taken into consideration when trying to make this tool?

The Helper

How can technology be created
to assist people with differences?

How can we help people that might be struggling to
adapt to a new country, society, culture, and that
challenges that come with it?

What can be done to help all regardless of differences?
How can technology be used to become an equalizer?

The Natural

What can people do that might be privileged in a certain situation assist those that may not be as privileged?

Does technology play a role in helping people in life-altering situations or should this strictly be left to the people?

The Soul Suckers

How might someone trying to maximize profit intentionally and unintentionally create a product that would hurt others?

What can be done to stop this? What factors would need to be considered and taken into account?

How can people be protected from others that are only after profit?

Is there a to prevent this harm from happening in the first place?

The Leader

What do people in positions of power need to understand in order to create change that benefits all?

Does Technology play a role in influencing change?

What technology can be created to help assist leaders and people in power with helping immigrant communities without further perpetuating harmful stereotypes and hurting an already marginalized community?

Should AI be used in decision making?

The Speaker

How can people use technology to
speak up for others?

How can technology be created with this use in mind?
What aspects would need to be considered to make this
technology beneficial?
